## Summary

---

Information Systems student seeking an **internship**, with hands-on experience in product management. Strong foundation in business systems, and reporting, with the ability to translate requirements into results and collaborate across teams.

## Education

---

### Bachelor of Science in Information Systems

Aug 2022 – Jun 2026

College of Computer and Information Sciences, Imam Muhammad ibn Saud Islamic University

## Experience

---

### DataLexing

Jan 2026 – May 2026

#### Intern Product Manager

- Conducted technical assessments and prepared detailed report identifying system issues, improvement opportunities, and feature enhancement recommendations to support product and operational development.
- Contributed to enhancing the user experience (UX) of authentication and login processes by identifying usability gaps and recommending interface and accessibility improvements.
- Monitored and reviewed Arabic localization quality for the Datalexing mobile app to ensure translation consistency, usability, and localization continuity across the system.
- Conducted competitor analysis and feature benchmarking focused on data visualization and analytics capabilities, including chart implementation methods, UI presentation approaches, and reporting experiences.
- Designed and developed HR management template and workflow automations using Activepieces to streamline leave management, HR requests, and internal administrative operations.

## Projects

---

### Bayan

GP, May 2026

- Conducted end-to-end product analysis for Bayan, an NLP and LLM-powered Arabic news neutrality analyzer, identifying system gaps, usability issues, and opportunities for feature enhancement to improve analytical accuracy and overall product performance.
- Led UX implementation and usability evaluation, identifying friction points in the analyzer flow and recommending improvements to interaction design, accessibility, and content readability.

## Skills

---

- JS
- QA
- APIs
